

MORNINGSTAR MINISTRIES 2012 CONSTRUCTION PROJECT

The Strong Tower 2012 school year begins in March. By then two more classrooms are required as 4th grade will be added and a computer lab is required. The projected building will house not only the two additional rooms on the first floor but also administrative offices which are needed as the student body continues to grow. Lord willing in 2013 the second floor would be added providing an additional two classrooms and a teacher work room. The construction will be steel reinforced concrete and brick, similar in appearance and structure to the existing duplex across the lot. By January there will be a need for electricians, plumbers, tile setters, carpenters and painters to do the finish work on the first floor once the structure has been completed. Volunteers can arrange to come by themselves or in teams. All volunteers will have to fill out the applications form at:

<http://www.morningstarperu.org/volunteers.html> Individuals who wish to integrate into an existing team can contact us at info@morningstarperu.org and you will be provided with dates and travel

options.

Should you have any questions regarding the volunteer experience please read through the travel guide and “Frequently Asked Questions” on our website at www.morningstarperu.org
