New Births

Anita turned 15 in early September. She came to us from the orthopedic clinic where she had been for the previous year after losing her right leg to tuberculosis. She has a very sweet disposition and is always eager to help out around the house and is working on catching up on her schooling after missing a couple of grades due to her surgery. Her prosthetic leg allows her to get around quite well. The exciting news is that a couple of weeks ago she accepted Christ as her Savior.

Luis and Rosa and their two adolescent boys were among the first converts in Pueblo Nuevo when the work began in that community 3 years ago, Rosa has been a valuable asset to Strong Tower where she works in the 3 year old classroom. Since their conversion, they have been a living witness to their family, sharing the gospel with them often. Last Sunday, Luis's parents came to Sunday School and Hipolito, Luis's father said the following; "I've been wanting to come and make a decision to follow Christ for quite some time, but my wife was not ready and I thought we should do this together. This week she told me she was ready and so we are here to ask God to forgive us and save us". Alberto had the privilege of going over the plan of salvation with them after which they prayed and accepted Christ into their hearts. Needless to say this was a source of much joy for Luis & Rosa, the believers that meet in Pueblo Nuevo and the angels in heaven.

Strong Tower Spring Picnic

Once a year, the families of students attending Strong Tower get together for a Spring Picnic. A gospel message is included as well as a delicious lunch. There were 180 in attendance this year, and most of them had to be encouraged to leave at 5:30pm since they were having such a good time and none really wanted to go home.

Happy Hula Moms

Morningstar Privilege Outing

Houses at Morningstar utilize a reward system for motivation and discipline purposes. Each child has daily chores for which they receive tokens upon completion of the task, they can request additional duties if they wish to earn more tokens. They have to return tokens as punishments for any misbehavior. Of course all this is predicated upon the redemption value of the tokens, and every so often an outing is planned where they make use of those tokens. This time it was the local mall, where they visited the arcade and playground. Those who did not have any tokens stayed home, (only Segundo this time) and the rest had a blast.

Supper concluded the outing and the kids are primed to earn more tokens for next time.

Mark & Kim DeJager and their children will be arriving this Tuesday, Oct. 6th. Please pray for their travels and the settling in process here in Chiclayo.

We got news yesterday that the Coates' resident visas have been approved! PTL

As we look forward, the construction of two new classrooms for Strong Tower is scheduled for January of 2010. There is a short term team being assembled in the U.S. to undertake the labor in this project. Should you or anyone you know be interested, just contact us at:
